

**August 7, 2024**  
**TAKE THE MYSTERY OUT OF ATTACHMENTS**

- |    |  |   |   |
|----|--|---|---|
| 1. | Even without attachments, teeth will move as the aligners alone will move teeth.   | T | F |
| 2. | Since rotations are relatively easy and the tooth is spinning on it's own axis, this movement is considered easy and every tooth should be ideally rotated into position during treatment. | T | F |
| 3. | Distalizing teeth is done routinely in clear aligner therapy.  | T | F |
| 4. | Clear Aligners are designed to correct skeletal issues such as Class II and Class III malocclusions.   | T | F |
| 5. | Utilizing functional appliances to correct Class II and Class III malocclusions is done prior to using Clear Aligners.   | T | F |

**TO RECEIVE 1 HOUR OF CONTINUING EDUCATION, PLEASE COMPLETE THE TEST SCAN AND EMAIL TO [LEE@RONDEAUSEMINARS.COM](mailto:LEE@RONDEAUSEMINARS.COM).**
